SAP BusinessObjects Solutions

As a SAP BusinessObjects channel partner, VEITS Group provides the following BusinessObjects solutions; SAP Crystal Reports, Xcelsius, Business Intelligence, etc. We have a team of consultants with an average of ten years experience in implementing these solutions.

SAP Crystal Reports

SAP Crystal Reports allows you to focus your time and money on activities that grow your business. VEITS programmers will help you get moving quickly by designing custom reports that fit your needs. Our programmers can create professional-looking reports while delivering the following features:

- Stunning report visualizations
- What-if scenario modeling
- Integrated operational reporting
- Quick report data sorting
- Multiple data views within a single report

SAP Crystal Dashboard Design

More and more businesses are turning to dashboards to keep real-time metrics in clear view at all times. VEITS Group recognizes the critical need of having information at your fingertips but we also recognize that every business and business role relies on different information to meet goals, deadlines, cut costs, and much more. As a SAP BusinessObjects Partner, VEITS Group provides our clients with customized dashboard solutions using SAP Crystal Dashboard Design that are molded to fit your specific business needs.

Our customized dashboards give you the ability to...

- **VISUALIZE** - visualize and interact with key performance indicators in a dynamic but intuitive user interface
- **CONNECT** - connect to live company data
- **ANALYZE** - easily perform "what if" scenario analyses and immediately see the impact of the results
- **EXPLORE** - drill down charts and maps that provide report-level details with a click of a button
- **UTILIZE** - utilize dynamic menu selectors to display large amounts of data clearly and concisely
- **EXPORT** - reports can be exported—with one click—to Microsoft PowerPoint, Word, Outlook, Adobe PDF, Adobe Flash, and the Web
- **INTEGRATE** - easily integrate reports with business systems

Business Intelligence

With Business Intelligence, users will be able to turn information into knowledge, and knowledge into profit. So what is business intelligence? BI enables your organization to track, understand, and manage your business in order to maximize enterprise performance. With BI, organizations are able to improve operational efficiency, build profitable customer relationships, and develop differentiated product offerings. Simply put, Business Intelligence software gives organizations the ability to use data to make more informed strategic decisions. Please contact VEITS Group for more in depth information regarding our Business Intelligence solutions.

Consulting Services

VEITS Group, a certified SAP BusinessObjects Solutions Provider, has extensive experience in helping companies successfully maximize their software investments. We are recognized throughout the industry for our intense focus on our clients' needs.

From Application Consulting to Report Writing; VEITS Group works with you to identify your needs and then custom tailor our solutions to fit them perfectly. Building close relationships with our clients and our drive to provide long-term value is what enables us to boast about possessing an unparalleled track record of repeat clients.

Our Consulting Services Include:

Report Writing and Enhancements

Are you sometimes forced to do double-data entry for third party software? Are you ever frustrated with employees having to carry out the tasks that software should perform? There are times when even the best applications have to be tailored to fit a business. Our team of consultants have experience in defining Crystal Reports to fit your processes, business, and people perfectly.

Support

Do you have a Crystal Report question that needs urgent attention? Our team of Technical Support Consultants are ready to help solve your most urgent and difficult challenges.

Training

VEITS Group offers novice to advanced level training. Training can be on-site, off-site, or web-based. We offer customized training for your staff based on their roles in the organization. We can even train you using your own data to maximize learning. In cases that it may be more cost effective for your organization, we also offer a "train the trainer" approach.

Application Consulting

Although your challenges are unique to you, our consultants have years of experience dealing with similar challenges. We combine this experience with our commitment to your success by providing solutions that are tailored to your individual needs.

Implementation Services

Our trademarked VEITS Implementation methodology coupled with our talented and knowledgeable consultants are proven to maximize your Crystal Reports investment.

Upgrades

We have developed a proven upgrade methodology and have extensive experience in migrating from previous Crystal Reports technology to the latest releases.
